REMARKS-General

At the interview of June 2, 2004, the Applicant demonstrated the invention to the Examiner via the internet, and the following relevant patents were discussed: Krause (U.S. Patent No. 6,067,069), Sherwood (U.S. Patent No. 6,212,498), and Tognazzini (U.S. Patent No. 5,850,211). Agreement was reached that if the claims were placed in a form more similar to Krause (U.S. Patent No. 6,067,069), the current application could be allowable. Examiner stated that he would enter an after-final amendment to the claims that put them into such a form, and would consider those claims in view of the discussion of prior art and the demonstration of the invention that took place at the interview.

The Applicant submits that, if the amendment is entered, the claims all define patentably over the prior art. Therefore, this application will be in condition for allowance, which action is respectfully solicited. As pointed out by the Examiner in the interview, assuming the application is allowed, the Applicant would file a Terminal Disclaimer with respect to U.S. Patent No. 6,067,069.

Very Respectfully,

Philip R Krause
Applicant Pro Se
